Aim of the Advanced Course

- Participate in a programme which has been specifically tailored to meet the current practice needs of surgeons and oncologists, and foster productive educational environment.
- Discuss special issues related to radical cytoreductive surgery and perioperative intraperitoneal chemotherapy.
- Review the surgical management of peritoneal metastasis with special reference to surgical technique, results, morbidity, and mortality.
- Discuss the concept and pharmacological basis of intraperitoneal chemotherapy (HIPEC and EPIC).
- Discuss multi-modal chemotherapeutic regimens and management of their toxicities.
- Discuss the impact of an organised and dedicated cytoreductive surgery and intraperitoneal chemotherapy approach on oncological outcomes.
- Review the current controversies in the treatment of peritoneal metastasis.

Ideal Advanced Course Candidate

- Chief-resident of surgery, gynecology and medical oncology
- Fellow surgeon, gynecologist and medical oncologist
- Consultant surgeon, gynecologist and medical oncologist
- Cytoreductive and/or pelvic surgeon

Educational Methods

- Short lectures
- Video presentations of cytoreductive surgery and intraperitoneal chemotherapy
- Case discussions
